Built a full-stack web application to allow clients byuing woods. Used react to allow users to instantly update web UI without reloading. Used redux as a state managment. Kept tracking users bugs and fixed them. Tetsted react components using Jest.

Worked with:

JavaScript	node/express
TypeScript	Redux
React,	REST API,
MongoDB, mongoose	Axious,

> FRONTEND ENGINEER, FREELANCE FEB 2021 - CURRENT

Built front-end applications with ReactJS. Components, pages, sorting, searching, pagination, filtering, popup windows, etc. Interacts with the backend, backend requests. Design pages navigation without reloading. A global data stores for the entire applications. Strongly typed code in TypeScript. LocalStorage to store sites settings. Lazy Loading (lazy loading) + debounce (optimization for finding pizzas). Optimized components redraws/renders, code splitting (separating code into specific JS files), and JS file tracking.

Worked with:

JavaScript	Redux toolkit	Jest
TypeScript	HTML5	node
React,	SCSS	express
React-router v6	REST API, axios	postman
